

ENVIRONMENTAL SUSTAINABILITY, QUALITY AND SAFETY

Environmentally-friendly mobile homes designed to reduce the impact on the environment.

A CONSCIOUS DECISION

Shelbox designs every mobile home using environmentally sustainable processes. Every phase of the manufacturing process has been optimized to enhance the environmental sustainability of our mobile homes and offer customers maximum comfort and performances.

DESIGN

The design of a mobile home must necessarily take into consideration the importance of natural resources. This is why Shelbox believes that choosing recyclable materials is a priority. Shelbox defines this approach "Design for Environment": customers may simply consider it an environmentally conscious decision.

ENERGY SAVINGS (STANDARD)

Low energy lamp

ENERGY SAVINGS (STANDARD)

- Double WC flush
- Water economizer integrated in faucets and showers

GAS SAVINGS (STANDARD)

19 kw water heater with open or sealed chamber, electronic ignition system without pilot light, installed in a dedicated technical room.

We believe and are committed to the responsible use of our forests: we only use real wood from certified "PEFC forests".

QUALITY

Shelbox S.p.A. has implemented a Quality Management System that has been certified by RINA. Thanks to this certification, the company is able to ensure to confirm the quality of its products and manufacturing processes and guarantee at the same time maximum satisfaction to its customers. In line with this view, in 2001 Shelbox S.p.A. obtained the UNI EN ISO 9001:2000 certification, which was later upgraded to the 2008 version.

This quality certification confirms that Shelbox is a company that complies with a series of requirements aimed at guaranteeing to end customers, communities and employees that the high quality environmental and work safety standards implemented are continuously monitored, verified and updated.

The ISO 9001 is based on the following important principles:

- **Continuous improvement:** promoting the culture of improvement

as methodological approach to work and product-oriented culture.

- **Customer satisfaction:** guaranteeing the manufacturer's capacity of marketing products with a quality that meets customers' requirements and law provisions concerning product quality and environmental protection.
- **Quality assurance:** promoting the importance of monitoring internal process and product manufacturing procedures.
- **Communications between business units:** managing communications between business units to ensure that all the actions taken are shared and allow the planned targets to be reached within the agreed timeframe and with the available resources.
- **Risk control:** identifying and assessing the health and safety risks and dangers for workers by preventing and monitoring workspaces.

All mobile homes produced by Shelbox S.p.A. are designed and manufactured to ensure the maximum satisfaction of customers and inspected throughout the whole manufacturing process.

SAFETY AND COMPLIANCE WITH STANDARDS

All Shelbox products comply with the severe European standards that regulate the design and manufacture of mobile homes.

GAS installations

European Standard UNI CIG 7129 – Defines the installation requirements for gas distribution systems.

Electric systems

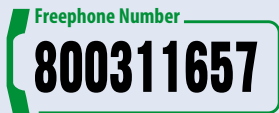

D.M.37/08 – Defines the safety requirements applicable to electric systems.

Ventilation system

European Standard UNI CIG 7129 – Defines the installation requirements for ventilation systems (grilles, fans, hoods) used for safety purposes.

The compliance with these requirements also applies to emergency exits.

SUPPORT

Customers who choose a Shelbox mobile home enjoy Shelbox global assistance services. Our experience in the field of prefabricated modules enables us to plan, design and build all modules with commercial materials and products. Our network of qualified technical emergency teams enables us to provide technical assistance in all the countries of the world.
